

## OUT OF THE WORLD

by sahelirima23

Creating an outer space desktop wallpaper using [Canva](#).

Let's get started.

### Supplies:

Smartphone/Computer/Tablets/other gadgets with good internet connection

Time and Patience
-------------------

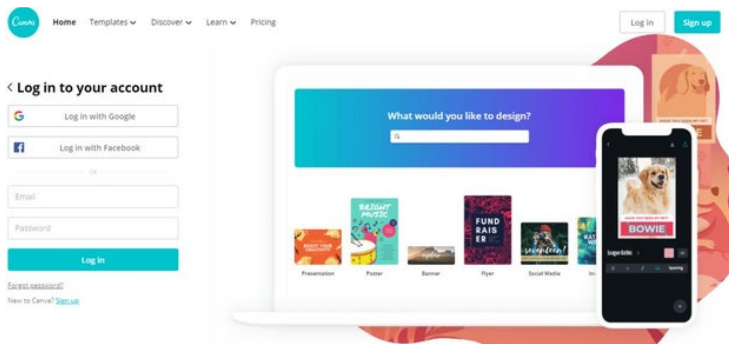

Enjoy creating

---

### Step 1: Signup/Login

- If you already have an account, you are welcome to skip this step
- If not, create one [here](#)
  - Using Google account
  - Using Facebook
  - Using email and password

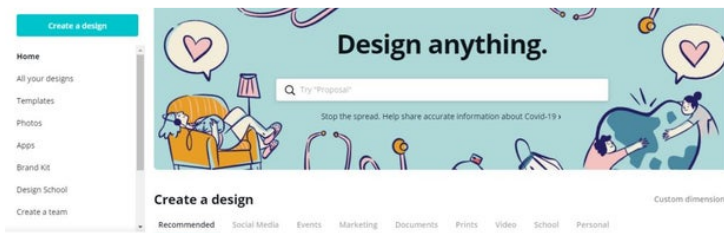

## Step 2: Go to "Create a Design"

You will now presented with the following interface

*Remember that you are creating your own design.*

***The steps are in no way the only way to follow but a guide for you to access it quickly.***

*So use your talents and apply them to get the desired output.*  
***Good luck!!***

## Step 3: Select a Template

In the search bar type the keyword "**space**" which will **text** present you with related templates to use.

***Lets choose the 4th one.***

Keep the text box position and the alignment unchanged .

***Edit the text***

Type: **OUT OF THE WORLD**

Add the **4th Font Combination** and **edit the**

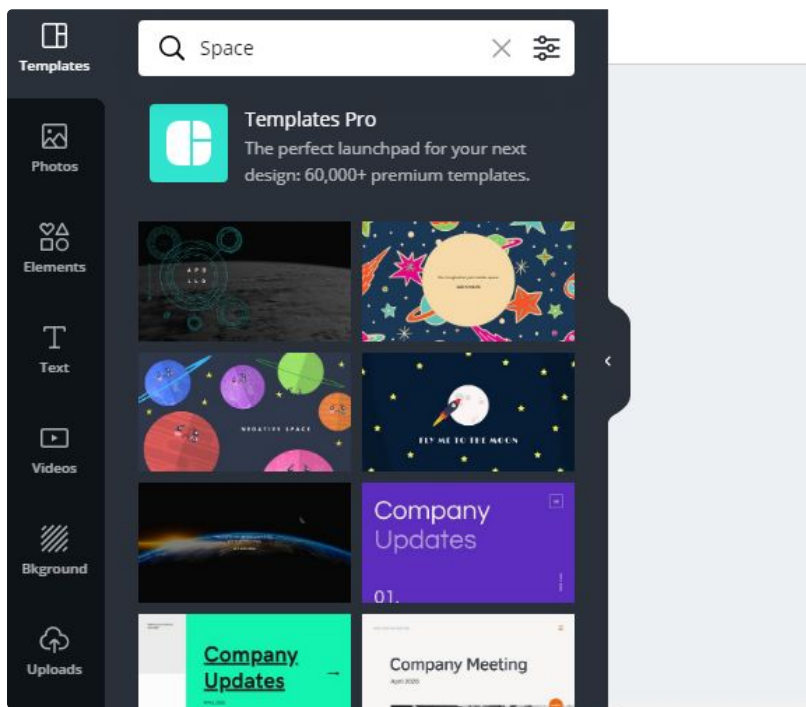

**For upper part:** *Capital letters*

Type "An astronautical"

**For lower part:**

Type "Experience"

Then proceed

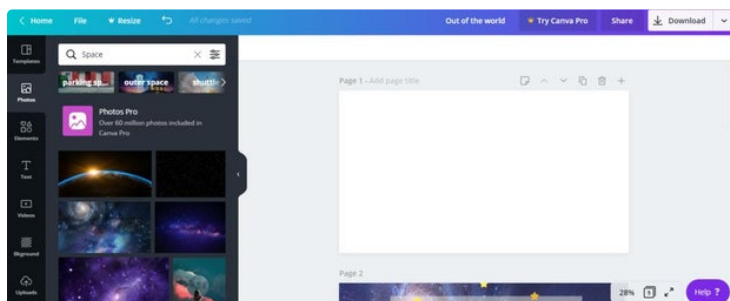

## Step 4: Change the Background With an Image

Start by navigating to Photos

In the search bar type the keyword "**space**" which will present you with related images to use.

Pick one of your choice and proceed

**P.S:- You can do this step after completing the next one**

## Step 5: Let's Custom Make a Design

The design will be created with items available for our use in the left hand panel.

Elements/shapes/frames/even upload your own image.

## Elements used

1. Astronaut
2. Orbit
3. Sun
4. Earth & Rocket

- **Dimensions should be balanced with regards to the area that needs to be covered.**
- **Crop and Flip features are present.**
- **Alignment and Orientation of elements can be changed by using the top panel options just below the head bar.**
- **Colors can be changed .**
- **Adjust/Effects/Filter gives you more flexibility to personalize.**
- **Transparency and Grouping features are also present.**

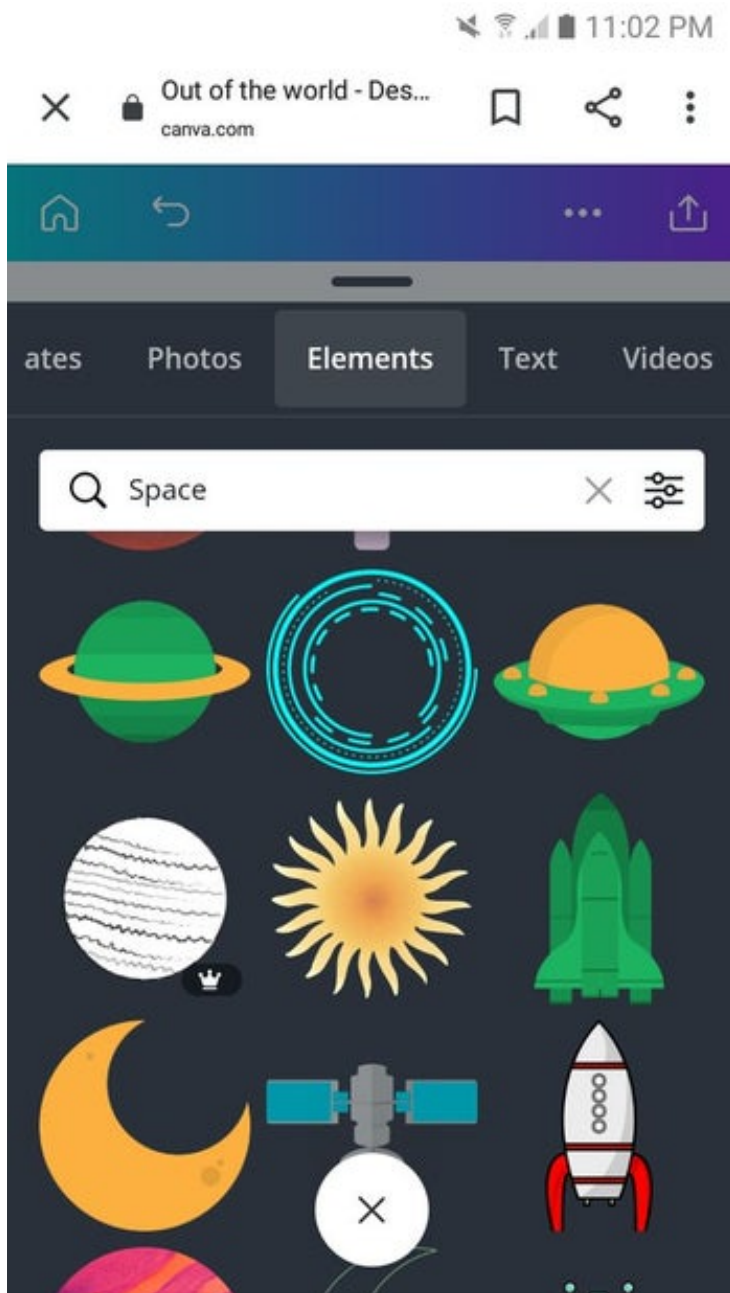

## Step 6: Adding the Elements

Navigate to the **element** section on the left hand panel and type **space** in the search box .

Incorporate the desired elements one-by-one .

Then proceed to the next step.

## Step 7: Finishing Touches

Check the visibility, size and color of the font

Save the file by changing the filename.

Here we save it as ***OUT OF THE WORLD***

---

## Step 8: CONGRATULATIONS!!

**You created an unique design .**

*Download/Share/Publish*

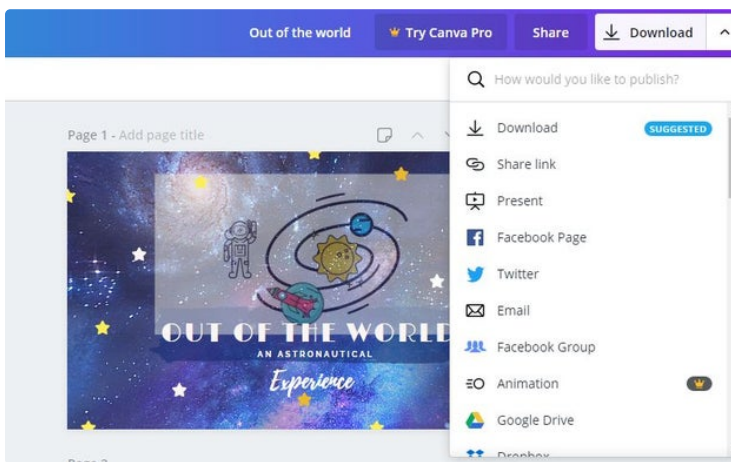

There are plenty of options available.

Choose as you wish.

Save as .png image

Share to twitter

and more.
